OFFER · AI CONTENT SYSTEM + CREATOR COACHING

Your own AI content engine, built for your products.

This month I'm fully dedicated to your business: building an AI content system around every product and personally coaching your creators, so your team can make professional videos every day in about 20 minutes each.

Product	Content	Quality	Team	Ongoing
AI system per robe	Viral reels, remade	Frame-by-frame checks	Creator coaching	Updates + support

Prepared by Alexandru Szasz

October 2026

WHAT YOU GET

A complete AI content system, tuned to each product

This isn't a generic tool. Every part of it was built, tested and locked for your robes, so your creators get proven results instead of trial and error.

01

A system for every product

Exact product references and tested try-on recipes for each robe. The robe always looks one-to-one like the real one: the hood, the colours, the trim, the foot pockets.

02

Viral reels, remade for you

Reels that already perform in your niche are rebuilt with your product: the same timing, the same reveal and the same spoken words, with a new person in a new room. A remake, never a copy.

03

Your brand in every shot

Your own branded packaging for unboxing and reveal hooks, 4K close-ups of the product features, and Christmas music timed to the reveal.

04

Real people, real homes

34 real women and 55 real homes, all selected by hand, with nothing that looks AI-made. They rotate automatically, so every video looks fresh.

05

Pro-level hooks

For the key hooks, the first frame is created and approved before anything is animated. That's how the videos look professional and not "AI".

06

Quality control built in

Every image and clip is checked frame by frame (face, product, hands, sound and timing) and redone automatically before your team ever sees it.

MY COMMITMENT

100% dedicated to your business this month

You don't just get a system. You get my full attention on two things: developing your business with AI and coaching your team until they run it with confidence.

Coaching your creators, personally

- **Personal setup for every creator.** From their first message, the system explains everything in plain language: what they get, what they do, and how quality is checked.
- **Training on what makes content perform:** spotting reels that already work, judging the first 3 seconds, inventing their own hooks, using start frames for a pro look, and finishing the text in CapCut.
- **Working efficiently:** getting 2–3 videos out of one product shoot by changing only the hook and the ending.
- **A complete illustrated guide** (web page + PDF), written for people who have never used AI or a video editor.
- **Ongoing feedback** on their videos, with fixes and improvements.

Developing the system, continuously

- New improvements, recipes and fixes throughout the month, sent to the whole team as simple update packs.
- Photo libraries kept fresh, and new ideas tested before your team spends on them.
- Available to you and your creators for anything technical, so your team only has to focus on ideas and posting.

WEEK 1

Products set up

References, recipes, packaging, libraries

WEEK 1–2

Creators onboarded

Setup, training, first videos together

WEEK 2–4

Daily production

I review, give feedback and improve

ALL MONTH

Updates + support

Fixes, new formats, answers

SPEED AND SCALE

From weeks per video to minutes

~20 min

from a reel or an idea to a finished 1080×1920 video. Classic UGC usually takes days or weeks.

Same day

A trend that appears in the morning can have your version live the same afternoon.

1,500+

videos a month possible with 5 creators making about 10 videos a day each.

- **No waiting on anyone:** no shipping, no shoots, no editor and no agency queue.
- **Low cost per video:** a few dollars in generation costs instead of the usual price of a UGC video or an agency edit.
- **More accounts, more tests:** enough volume to run several accounts per product, test many hooks every day and double down on whatever takes off.
- **Easy to grow:** a new creator is producing on day one, and a new product plugs into the same system.

What it can earn (illustrative example, not a promise)

1,500 videos a month. If only 1 in 20 reaches 50,000 views, that's about 3.75 million views from those alone. If 1 in 200 viewers clicks and 1% of those buy a $70 robe, that's about 190 sales, or roughly $13,000 a month, from the best 5% of the videos. Every bigger viral hit comes on top. With this volume you don't depend on luck: you get dozens of shots on goal every day.

INVESTMENT

Your proposal for this month

This month covers the full build of the system for your products, the onboarding and coaching of your creators, and my full dedication to your business. I'd like you to name the investment you think is fair for it.

This month: AI system build + creator coaching + full dedication

Your proposed amount:

_____

ALREADY AGREED · FROM NEXT MONTH

10% per creator, paid upfront each month

Covers the system, the updates, the maintenance and my ongoing support for your creators.

Included in both

- The AI content system for every product, kept up to date.
- Your content stays yours: every video your team makes is yours to keep and use.
- Generation tools run on your own accounts, so you keep full control of content and costs.
